1. Introduction

The PiFocus App is a next-generation parental control and monitoring platform designed to give parents peace of mind while ensuring that children remain safe, disciplined, and focused in their digital learning environment.

Unlike traditional monitoring tools, PiFocus combines powerful controls, real-time monitoring, and detailed analytics with features that promote both safety and productivity. It comes with in-built applications and smart features such as tracking device activity, blocking unwanted apps or websites, restricting distractions, and enabling smooth parent-child interaction when needed.

It works seamlessly across:

- PiBook (Android-based learning laptop)
- Personal Windows laptops/desktops

PiFocus allows parents and guardians to:

- View live screen activity remotely
- Capture ambient surround sound from child device
- Get system analytics to track screen time and progress.
- Manage and control apps and device usage
- Lock or unlock the device when needed
- Interact directly with their child via instant calls or video
- Monitor device activity live – View real-time screen activity of their child's device from anywhere.

By combining safety, productivity, and learning support, PiFocus creates a healthy digital environment where children can thrive while parents remain reassured and connected. It is not just a monitoring tool, but a comprehensive digital parenting companion.

2. Installation & Login

2.1 Installing PiFocus (Mobile)

- Download the PiFocus Parent App from Google Play Store / iOS App Store or the official PiBook Website.
- Run the installation and accept permissions.
- Open the app → Shortcut created automatically.

2.2 Installing PiFocus (Windows exe)

- Download the setup file from the official PiBook website or the app from the Microsoft Store.
- Run the .exe → Accept terms → Click Install.
- Finish setup → Launch PiFocus from Desktop or Start Menu.

2.3 Registration & Login

- Open PiFocus App (mobile or desktop).
- Tap Register / Login.
- Enter registered mobile number.
- Input OTP received via SMS.
- Login successful → Home Dashboard opens.

3. Dashboard Overview

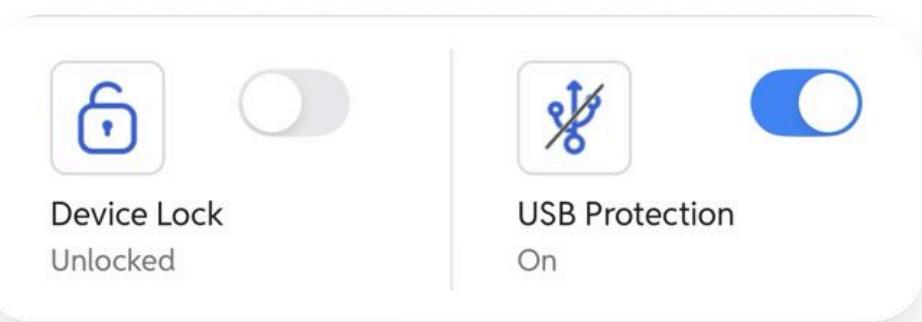

Once logged in, parents will see a centralized dashboard with easy access to:

- Live View → Monitor child's screen activity in real-time.
- Controls → Lock/unlock device, block apps/URLs, restrict internet, manage time.
- Notifications → Alerts on suspicious or flagged activity.
- Reports → Insights into learning progress, device usage, and focus time.

4. Key Features

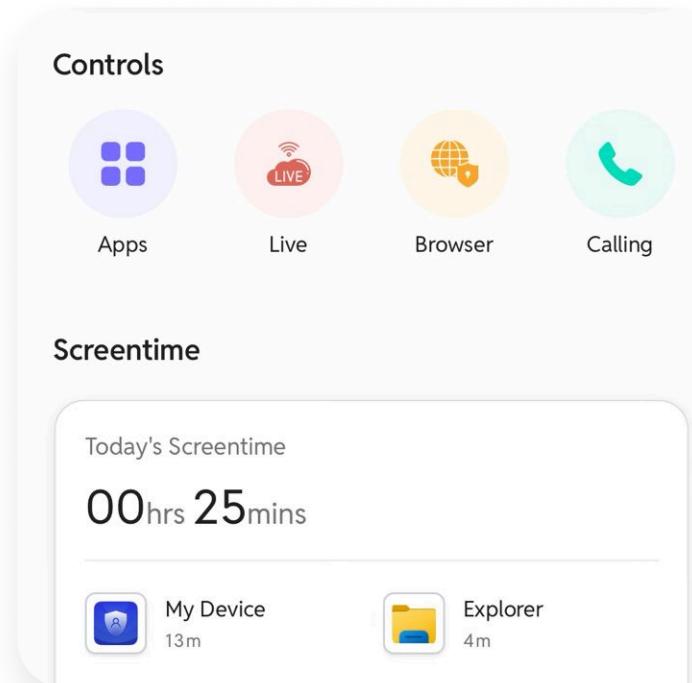

4.1 Live Screen Monitoring

- Open Live View on dashboard.
- Select the child's device (PiBook or personal laptop).
- View real-time screen activity and take Screenshots.
- Option: Initiate instant call/video call for guidance.
- Capture ambient sound through our Surround Sound feature.

4.2 Device & App Control

- Open Controls.
- Options available:
 - Lock Device (temporary freeze)
 - Close/Block Apps
 - Block Website URLs
 - Set Usage Schedules (study mode, no distractions)

4.3 Analytics & Insights

- Select Device or Profile: Choose the child's device (PiBook or personal laptop) to view usage metrics in detail.
- Application Usage: See which apps are opened, how often they are used, and the total time spent on each application.
- Screen Time Activity: View daily and weekly screen time in a graphical format for a clearer understanding of usage patterns.
- Peak Usage Hours: Identify what times of the day the device is most active, helping parents spot trends such as late-night or early-morning usage.
- Comparative Insights: Track and compare weekly progress to see whether screen habits are improving, staying consistent, or increasing over time.

5. Troubleshooting

App not opening

- Restart device, reinstall PIFocus App

OTP not received

- Wait 2 mins, check SMS balance/network, retry with alternate number or click on "Re-Send OTP"

Video/recorded playback lag

- Check internet connection on both parent & child devices
- Switch to Wi-Fi, clear cache, update to latest app version

Screen not loading in Live View

- Ensure child device is online & connected to PIFocus server, or Re-bind the account

Unable to lock/unlock device

- Restart the child device, reconnect Wi-Fi, confirm PIFocus service is running

App showing "Device Offline"

- Verify correct mobile number, clear app cache/data, or reinstall

Login failing repeatedly

- Whitelist PIFocus app in antivirus or firewall settings

Frequent auto-logout

- Ensure stable internet, update to latest app version, and check for multiple active logins

Audio/Video call no connecting

- Allow camera & microphone permissions, switch to stable Wi-Fi, retry after 30s

6. FAQs

Q1. Can PiFocus monitor both Android PiBook and Windows laptops?

-Yes, PiFocus works on both platforms seamlessly.

Q2. Will my child know when I'm monitoring?

-Yes, PiFocus displays a small on-screen indicator for transparency.

Q3. Can I view my child's device remotely when I'm not at home?

-Yes, as long as the child's device is connected to the internet.

Q4. Can I use multiple parent logins?

-Yes, multiple guardians can log in, but only one active live view is allowed at a time.

The option to log in different devices with the same phone number is also present.

Q5. Can I add multiple child devices?

-Yes, multiple child devices can be added and switched between.

6.1 Privacy & Security FAQs

Q6. Is the surround sound feature recording everything in the room?

-No. Surround sound only streams live audio when the parent enables it. Nothing is stored or saved on our servers.

Q7. Can PiFocus staff or third parties listen to my child's sound or calls?

-Absolutely not. All communication (screen, sound, and calls) is end-to-end encrypted. Only the registered parent account can access it.

Q8. Are my child's activities logged on third-party servers?

-No. We do not share or sell data to any third party. Data remains private between the parent and child device.

Q9. Can video/audio calls be tracked or accessed later?

-No. Calls are encrypted, temporary, and not recorded. Once a session ends, no history or files exist on our servers.

Q10. Does PiFocus comply with child data protection standards?

-Yes. PiFocus follows strict data security practices to protect children's privacy while still empowering parental safety.

7. Tips for Best Experience

- Always use stable Wi-Fi for smooth monitoring.
- Schedule regular device-free hours to build discipline.
- Monitor important reports weekly for review.
- Keep the app updated to get new features and security patches.
