Installation guide for Pifocus

PiFocus is a management service which helps parents be an active member of the child's digital journey.

In order to use this service there is one application named ***My Device*** to be installed in the child's laptop and one application named as ***PiBook parent*** to be installed in the parent's mobile.

For child -

Name of the app - My Device
Check whether the child laptop is windows or android and based on the type install relevant file.
Windows - insert link for webpage / Microsoft store
Android - insert link for webpage

- Install the correct link.
- After installation, **open the app** from the search bar.
- The app will ask for some permissions →Yes on all
- You will see a screen with the option **"Install Components"** → click on the button.
- Within a few seconds, the components will be installed automatically.
- That's it – installation is complete.
- Now you are ready to use the My device app.

For parents -

Name of the app - PiBook Parent
Based on the mobile type (iOS or android) install relevant files.
Android - insert link for webpage / Play store
iOS - insert link for webpage / App store

- Open the app → enter your mobile number → tap Get OTP.
- Enter the OTP received to log in.
- Add your Name and select your Relation (e.g., Mother/Father/Guardian).
- Scan the QR code from your child's device to connect.
- Installation is complete. Now you are ready to use the Pibook parent app.
